FIG.16

Fig. 1 is a schematic diagram of a multi-layered structure 10. The structure is composed of several layers and components. At the top, there is a layer 13e. Below this, there is a section 13b. Within section 13b, there are vertical elements 13a and horizontal elements 13d. A dashed line 14 indicates a boundary. A dimension line 22 shows a distance between horizontal elements. A dashed line 20 indicates a boundary. The structure is composed of multiple layers 53 and 16.

FIG.38

This diagram illustrates a mechanical assembly consisting of two vertical sections joined by a horizontal component labeled 20. Each vertical section features a central column 13a flanked by two side columns 13b. The top section is capped with a series of layers: a base plate 13e, followed by a textured layer 16, another textured layer 23, and a top surface 23. Small protrusions 14 are visible at the very top. Dimension lines indicate a height of 60 (or 59) for the upper portion and 61 for the lower portion.

FIG.47

FIG. 49

FIG.50

Fig. 1 is a schematic diagram of a multi-layered printed circuit board (PCB) assembly. The diagram shows a top layer (14) with a central rectangular opening (16) and four rectangular pads (13e) at the corners. Below this is a core layer (13a) with four vertical rectangular openings (13b). A middle layer (57) with a central rectangular opening (16) and four rectangular pads (13e) is positioned below the core. The bottom layer (13e) has four rectangular pads (13e) at the corners. The assembly is shown with a central rectangular opening (16) and four rectangular pads (13e) at the corners. Dimensions R and S are indicated. Labels 62, 16, 13e, 13b, 22, 57, 20, and 13a are used to identify various components and dimensions.
